Product [SRP]

Characteristics

Spotrepair is perfect for overlapping wet areas after using Novaclear Coat. Spotrepair has excellent thinning properties to let old and new varnish flow freely together. Spotrepair facilitates polishing. Spotrepair is essential for good results and saves time.

Use

- Sand the surface to be treated with a No. 2000 grain.
- Apply 2 to 3 thin layers on the transit zones of the fresh Novaclear Coat and the existing varnish to obtain a homogenous coat.
- Remove residue with Novacare NC1.
