

Nova Power Paint

CONCENTRATED ACRYLIC PAINT

- ✓ Unique adhesion without primer.
- ✓ High coverage.
- ✓ Fast drying.
- ✓ Remains flexible.

Technical Info

- Appearance (at 20°C): aerosol.
- Odour: solvent.
- Colour: variable.
- Flashpoint: < 21 °C.
- Water solubility: moderately soluble.
- Shelf life: 36 months, keep dry, cool and frost-proof.
- Safety measures: consult the Safety Data Sheet.

Packing

Nova Power Paint black (RAL 9005) - aerosol 400ml	120222000
Nova Power Paint white (RAL 9010) - aerosol 400ml	120232000
Nova Power Paint red (RAL 3020) - aerosol 400ml	120242000
Nova Power Paint anthracite - aerosol 400ml	120213000

Product [PNT]

Characteristics

Nova Power Paint contains more solids and fewer solvents, resulting in a large covering capacity and a lower environmental impact. Super-fast drying - dust-dry after 5 minutes at 20 ° C and gas-resistant after 24 hours. Nova Power Paint has a unique adhesion and can be used on most plastics without a primer. Nova Power Paint is permanently flexible due to the added plasticizer and has good adhesion to bare metals.

Applications

- finishing of Nova Power Grip plastic repairs.
- refreshing bumpers, grills, spoilers, decorative strips, door sills, protective mirrors for exterior mirrors, control cabinets, ...
- can be perfectly used on flexible materials such as vinyl, also for tarpaulins.
- good adhesion to most plastics - including polycarbonate and polyester such as illuminated signs, ... and PVC such as signage.

Use

- Apply on pure, dry and roughened surfaces. If necessary, clean with Safety Clean and / or Multifoam and wipe dry
- If necessary, sand with grit 800 dust and clean with Multifoam.
- Shake the can well for 2 minutes.
- Apply in thin layers to 30 cm and respect the drying time of 10 minutes.
- Empty the nozzle spraying with the can upside down.
