Product [SSH]

Characteristics

Surface Shine cleans and protects matt or polished metal, lacquer and plastics. Surface Shine does not attack edge materials such as glass, plastics or rubbers and is free of silicones, oils and solvents.

Applications

- For removal of black oxidation soiling after cleaning with Surface Polish.
- For protecting and shining lacquers, foiled plastics and coloured plastics.

Use

- Shake can well before use.
- Spray the surface homogeneously.
- Rub out and polish with a dry, soft cloth.
