

Megaclean

CLEANING AND ETCHING WITH 1 PRODUCT

- ✓ Strong solvent cleaner and diluent.
- ✓ Ideal etching agent before glueing, for lacquers,
- ✓ Creates, by etching, a good adherence to most lacquers, such as powder coating and synthetic materials.
- ✓ Diluent for epoxys.
- ✓ Superstrong and evaporates quickly.
- ✓ Works as fluid abrasive (etching).
- ✓ Colourless.
- ✓ Ideal tool cleaner for adhesives and epoxy works.
- ✓ Soluble in water.

Technical Info

- Colour: colourless.
- Odour: charcateristic.
- Vapour pressure at 20°C (hPa): 105.
- Boiling point: 80°C.
- Solidification point: -86°C.
- Flash point: -4°C.
- Soluble in: water, alcohol, ether.
- Density at 20°C: 0,804 - 0,808 kg/l (ASTMD 4052).
- Shelf life: 36 months, keep dry, cool and frostproof.
- Safety measures: consult the Safety Data Sheet.

Product [MCL]

Characteristics

- Strong cleaner and solvent.
- Ideal etching agent before glueing, for lacquers ans reparations.
- Excellent diluent for epoxys.
- Works as a fluid abrasive on most lacquers and synthetic materials.
- Superstrong and evaporates quickly.

Applications

- Ideal to use for the finishing of epoxys.
- Fluid abrasive for hardened epoxys such as Multipox, Repapox, Styropox, laquers,
- Removes hardened polyurethane.

Use

- Always test first on resistance and colour fastness
- Does not affect carbon steel, stainless steel, polyester, aluminium and Teflon.
