

# Novakleen pH9

### LIQUID CLEANER FOR NATURAL POLLUTION

- For cleaning and degreasing of all water-resistant surfaces.
- ✓ Non-corrosive, non-flammable and biodegradable.
- Fresh odour.

## **Technical Info**

- Composition: a stabilized blend of biodegradable surfactants and penetrants with oxygenated solvents and modified alkalies with no free caustics.
- · Flammability: not combustible.
- · Odour: fresh.
- · Colour: transparent amber.
- pH: 9,1.
- Toxicity: non-toxic when used properly do not take internally.
- Meets the AOX norm: free of Absorbable Organic Halogens.
- Shelf life: 24 months, keep dry, cool and frostproof.
- Safety measures: consult the Safety Data Sheet.

## **Packing**

Novakleen pH9 - bottle 1I	490410000
Novakleen pH9 - IBC	490411000
Novakleen pH9 - drum 25l	490425000
Novakleen pH9 - barrel 210l	490420000

## Product [NVK PH9]

#### Characteristics

Novakleen pH9 is a powerful blend of water-soluble solvents, penetrating agents, wetting agents and synthetic detergents with the ability to attack the molecular structure of soils, greasy deposits, gummy residues and imbeddes grease stains without damaging the surface itself. Soils are then detached by capillary action and emulsified for complete removal by mopping or rinsing. Novakleen pH9 is biodegradable and does not contribute to water pollution. Novakleen pH9 is non-flammable and nontoxic to humans or pets.

#### **Applications**

- Novakleen pH9 can be used on all kinds of surfaces: synthetic materials, textiles, carpet, vinyl, canvas, formica, paint, metal, wood, chrome, aluminium, stone, concrete, tiles, polyester, plexiglass, rubber.
- For the removal of most sorts of dirt: natural greases and oils, nicotine, diesel deposits, dead insects, adhering dust, shoe polish, pencil marks, ... .
- Construction: for a flawless finish of all joints with the most kit types that cure under the influence of humidity: silicones, polyurethanes and MS polymer sealants.

#### Use

- Spray in an upward motion and let it soak in (+/- 2 min).
- If necessary, brush the dirt out of the pores with a hard brush.
- Remove the dirt from bottom to top with a clean cloth.
- Rinse with clean water.

When used on fabric, upholstery and carpet, always treat the whole surface, then dab it with a clean cloth and vacuum it. Test the material for colourfastness on an inconspicuous area.

If it comes into contact with glass, always rinse thoroughly and immediately wipe off! When Novakleen pH9 dries on glass, it causes permanent stains.

Biodegradable according to EN 648/2004.
