

Novaleak Water

FAST DETECTION OF WATER LEAKS

- ✓ Time saving: traces leaks quickly and efficiently.
- ✓ Is compatible with antifreeze and coolants.
- ✓ Very easy and safe to use.
- ✓ Can stay permanently in the fluid for future inspections.
- ✓ Appropriate for all cooling systems.

Technical Info

- Appearance: liquid.
- Composition: fluorescent yellow.
- Odour: almost odourless.
- Solubility: mixable with all water based products; insoluble with oils.
- Colour: dark amber-coloured.
- Shelf life: 36 months, keep dry, cool and frost-proof.
- Safety measures: consult the Safety Data Sheet.

Packing

Novaleak Water - bottle 20ml

750111000

Product

Characteristics

Novaleak Water prevents the long search for possible leaks in cooling systems. Novaleak Water quickly traces water seepage in leaking installations. It can be left in the cooling system permanently and therefore simplifies future inspections. Novaleak Water will give a fluorescent effect after mixing with cooling water. With the help of Novaleak Lamp the fluorescent contrast will become clearly visible. The Novaleak Lamp is delivered together with U.V. safety goggles. They protect the eyes against UV-light and make the contrast liquid even more visible.

Use

Mixture: Novaleak Water mixed with water gives a bright fluorescent yellow colour.

Consumption: 20 ml / 30 litres water.

Cleaning: remainders can be cleaned with Novatio Novakleen or Aquasolv.
