

FIN-130 Finisher

THE PERFECT FINISH FOR ADHESIVES AND SEALANTS

- ✓ Professional smoothing of all sealants.
- ✓ Can be painted over without rinsing*.
- ✓ Handy packaging with high efficiency (Bag-on-Valve).

Technical Info

- Composition: aqueous complex of surfactants and alcohols.
- Form: liquid.
- Colour: transparent.
- Odour: characteristic.
- Relative density (at +20°C): 1.
- pH: 7 (neutral).
- Consumption per 400ml: +/- 140 running meters.
- Shelf life: 24 months, dry, cool and frost-free.

Packing

FIN-130 Finisher - aerosol (Bag on Valve) 400ml 120001000

Product [FIN-130]

Characteristics

Finisher is pH neutral, therefore safe on every surface, compatible with every type of adhesive or sealant. Smoothing with Finisher ensures a perfectly smooth and closed joints, accelerates the curing of polymers and reduces the risk of mould growth on sanitary joints. Contains no propellants, is biodegradable and non-toxic.

*Can be painted over without rinsing if the substrate permits.

Applications

- Smoothing of joints.
- Compatible with e.g. MS-polymers, silicones, acrylic sealants, PU adhesives, etc.

Use

- Moisten the spatula, applicator tool or finger with Finisher.
- Smooth the joint and remove excess material.
