Product [BSC]

Characteristics

Butalu Circular is a double-sided adhesive and sealing band on roll. Remains flexible and does not harden due to its unique composition based on modified butylene rubbers.

Butalu Circular offers a very high immediate bonding strength, even on materials that are difficult to bond.

Adapts perfectly to any surface.

Applications

- flexible bonding - temporary or permanent - also on difficult materials.
- gives an immediate adhesion in combination with Seal & Bond MS60.
- prevents galvanic action in metal constructions.
- bonding of PE foil in doors and roof covering.
- sealing of cable passages, rear lights, surface mounted sliding roofs.
- eliminates vibrations.

Use

- Apply to dry and clean surfaces, if necessary clean with Safety Clean and/or Multifoam.
- Remove protective paper, apply and press firmly.

First test PE, PP, silicone and bitumen based surfaces for adhesion.
