

# MBX

REMOVE GLUE RESIDUES SAFELY AND FAST

- ✓ Sand-blast effect thanks to the unique folded, polished and hardened spring steel.
- ✓ The flexible arrangement of the steel wires makes it possible to process all shapes.
- ✓ Maximum flexibility, MBX band carried on air cushion.

## Technical Info

### Packing

MBX band - coarse, black	356110000
MBX band - medium, beige	356120000
MBX band - Inox	356135000
MBX Rubber Brush	356140000
MBX band - green - width 11mm	356131000

## Product [MBX]

### Characteristics

MBX bands are made of high quality polyamide fabric with a tensile strength of up to 440 kg. The spring steel wires are anchored in a U shape. This product offers optimum flexibility. Safety and life span: no saturation, heating or polishing necessary. MBX Rubber Brush makes it possible to remove glue residues safely and quickly. MBX Rubber Brush is made up of the latest high-tech polymers and has a long lifespan.

### Applications

- Coarse: 0.7 mm spring steel, bent, polished and hardened for a coarse sand blast effect. Removal of cement residu from tools, removal of coating and sealing.
- Medium: 0.5 mm spring steel, bent, polished and hardened for a fine sand blast effect. Removal of paint and rust.
- Fine: 0.5 mm spring steel, straight, no sand blast effect. Removal of gaskets. Removal of contamination, joints, hardened glues and varnish.
- Stainless steel: 0.5 stainless spring steel, straight, no sand blast effect. To remove coloring of stainless welds and paints and corrosion from aluminum.
- Rubber Brush: Width: 31 mm. Removal of glue and silicone residues, limescale deposits and lettering of sensitive materials.

## Use
