

Seal & Bond Finisher

VERSATILE LEVELLING PRODUCT FOR PROFESSIONAL FINISHING KITS

- ✓ Smoothly levels all seams of most silicone, polyuréthane or MS polymer type kits.
- ✓ Speeds up hardening.
- ✓ Provides a nice satin shine.
- ✓ Free of acids and solvents.
- ✓ Pleasant odour.
- ✓ Safe on most surfaces, even on natural stone.
- ✓ Comes in a handy manual pump spray.
- ✓ Not flammable.
- ✓ Biodégradable.

Technical Info

- Look: liquid.
- Odour: pleasant.
- Viscosity (20°C): 1mPa.s.
- Relative density (20°C): 1.000 kg/l. pH: 7.8.
- Water solubility: entirely soluble.
- Vapour pressure (20°C): 2332 Pa.
- Boiling point/Boiling range: 100°C.
- Melting point/Melting range: 0°C.
- Volatile organic components (VOS), %:0.
- Shelf life: 24 months, keep dry, cool and frost-proof.
- Safety measures and storage: please consult the safety data sheet.

Product

Characteristics

Seal & Bond Finisher is a biodégradable levelling product for a perfect finish of all seams of most types of kits that harden by humidity: acrylic, silicone, polyuréthane and MS polymer kits. Seal & Bond Finisher has a safe, waterresistant formulation that is solvent-free and can be used on most surfaces.

Use

Spray Seal & Bond Finisher on freshly applied kit, finish as desired and remove excess product.

Application on natural stone: after hardening, rinse with pure water.

For sensitive surfaces: if needed, test on a small, non-visible spot first.

If the kit is to be painted over, varnished or sprayed: let the kit harden, wipe with a moist cloth and wipe dry.
