Product [AFR]

Characteristics

Al-Fix Remover is a 100% active removing agent without solvent, for adhesives based on ethyl cyanoacrylate. Al-Fix Remover removes Al-Fix from various materials. Al-Fix Remover can also be used as a softener for other glues and polyurethane foams.

Applications

Suitable for removing residual glue from: most metals, aluminium, glass, plexiglass, polyester, polystyrene, ceramics,...

Use

- Apply and allow the product to act; time will depend on application.
- Remove the adhesive residue.

Always check the material being treated for resistance and colourfastness on an inconspicuous area.
