

Novelec

CONTACT CLEANER

- ✓ For all electrical and electronic applications.
- ✓ High penetrating capacity, evaporates quickly without leaving any residue.
- ✓ Does not corrode - safe on most lacquers and plastics.

Technical Info

- Composition: hydrocarbons, alkanes, hexanes and cyclic compounds.
- Form: bright, transparent liquid.
- Density: +/- 0,7 kg/dm³.
- Color: transparent.
- Odour: characteristic.
- Flash point: < 0°C.
- Vapour pressure at 20°C (hPa): 190.
- Solubility in water: partially.
- Shelf life: 36 months, keep dry, cool and frostproof.
- Safety measures: consult the Safety Data Sheet.

Packing

Novelec - aerosol 400ml

235001000

Product [NEC]

Characteristics

- A powerful contact cleaner which does not contain any chlorinated solvents.
- Evaporates quickly and does not leave any residues behind on the surface.
- Does not cause any corrosion on contacts or components.

Applications

- Cleans safely all kinds of electric and electronic parts, instruments and appliances for telecommunications, transport, food and chemical industry.
- Especially suitable for cleaning printed circuits, motors, relays, adjustable resistances, revolving and tumbler contacts, alternators,

Use

Before use on synthetic materials, test the resistance.
