Product [SOF]

Characteristics

- A quick and efficient stripper that avoids the need for sanding, brushing and cutting away.
- Can be used safely on all kinds of metal, wood, plaster, stone and glass.
- Because of its efficient composition STRIP OFF removes paint, varnish, glue, tar, carbon deposits, packagings, ...
- Does not drip, so it can be applied sparsely and economically on vertical surfaces.

Applications

- Removal of: car paints, undercoating, stickers from bumpers and windows, old packaging on all types of metal, hardened oils and carbon deposit on valve seats, cylinders and other engine parts.
- Stripping of: varnish, paint, resin, bitumen, pitch and graffiti on walls, windows, panels, joinery, boats, traffic signs, road building equipment, tools, etc.

Use

- After releasing the mixing ball, shake well before use.
- Apply, let work for a few minutes and scrape off.
- Repeat the treatment if necessary.
- Rinse with water.

Protect the area that is not to be treated if necessary.
