

# Nova Antiskid Tape

BLACK, SELF-ADHESIVE ANTISKID TAPE

- ✓ Semi-vulcanised quality rubber on a PVCfilm, covered with an acrylic glue.
- ✓ Very effective antiskid structure.
- ✓ Does not absorb any moisture or water.
- ✓ UV- and ageing resistant.
- ✓ Resists temperatures up to +160°C.
- ✓ Universal applications, for in- and outdoor use.

## Technical Info

- Top layer: semi vulcanised rubber.
- Glue layer: acrylate glue.
- Intermediate layer: PVC-film.
- Colour: black.
- Pressure sensitivity: hardens by pressure.
- Temp. resistance: resists temp. up to +/- 160°C.
- UV-resistance: OK.
- Non-ageing: OK.
- Impermeability: excellent.
- Hardness: Shore A 85-95.
- Adhesion on BA-steel: 32,5 N/25mm.
- First test foundations based on PE, PP, silicones and bitumen for adhesion (see each tape).
- Shelf life: 24 months, keep dry, cool and frost-proof.

## Packing

Nova Antiskid Tape - roll 10cm / 106cm

566110000

## Product

### Characteristics

Nova Antiskid Tape is a semi vulcanised quality rubber on a PVC film, provided of an acrylate glue. Nova Antiskid Tape is highly temperature resistant by positive or negative fluctuation of temperature. Nova Antiskid Tape has no water absorbing capacity.

### Applications

- As antiskid on cellar stairs, emergency stairs, swimming pools, lubricating stations,...
- On entering steps of trucks
- As buffer plate on walls and doors
- As antiskid on the bottom of tool kits
- As safe bearing surface on e.g. earth-moving machines

## Use
