

# Novairco Leak

Additives

Fluorescent leak detector for air conditioning and cooling systems R134a and R1234yf

- ✓ Fast, safe and effective for finding leaks
- ✓ For R134a and R1234yf gas
- ✓ May remain in the circuit for later inspection

## Technical Info

- Form: liquid.
- Color: fluorescent green.
- Odor: characteristic.
- Flash point: > + 200 ° C.
- Relative density at + 20 ° C: 0.99.
- VOC content: 0%.

## Packing

Novairco Leak - 6 x 7,5ml	743003390
Novairco Combi Pack UV	743012390

## Product [NAL]

### Characteristics

Novairco Leak is safe for detecting leaks in air conditioning and cooling systems and can remain permanently in the system. Safe for aluminum, plastic and rubbers, but also safe during recuperation. The leak location lights up green fluo when using a UV lamp. Suitable for all gas systems based on R134a and R1234yf. Based on PAG lubricant and without solvents, compatible with all lubricants used in air conditioning and cooling systems.

## Use

- Place the syringe on the coupling piece and connect it to the system.
- Insert the content and let the cooling system run at the lowest temperature for at least 30 minutes.
- Inspect system with UV lamp.

Consumption for large refrigeration circuits: a syringe per 1.5kg cooling gas.
