

2K Solid Lite Gun

LIGHTWEIGHT HIGH-POWER 2K GUN

- ✓ Snap-fit attachment for automatic cartridge positioning
- ✓ 26:1 force transmission with thrust force up to 5 kN (~500 kg)
- ✓ Integrated anti-drip brake and trigger release
- ✓ Robust housing in carbon-reinforced nylon

Technical Info

- Type: Manual 2K dispensing gun.
- Volume: max. 600 ml (2 x 300 ml).
- Force ratio: 26:1.
- Maximum pressure force: 5 kN (~500 kg).
- Stroke: 3.5 mm.
- Weight: 1.20 kg.
- Total length: 365 mm.
- Housing material: Carbon-reinforced nylon.
- Colour: Black.
- Anti-drip: Yes — integrated brake in trigger.
- Mounting system: Snap-fit (U-shaped opening).

Packing

2K Solid Lite Gun 1:1 600ml

Product [2KSLG]

Characteristics

The Novatio 2K Solid Lite Gun is a manual dispensing gun for 600 ml two-component cartridges with a 1:1 mix ratio. Its snap-fit attachment system, high gear reduction ratio, and integrated anti-drip function provide accurate, drip-free dispensing of high-viscosity 2K products. The carbon-reinforced nylon construction guarantees a long service life under professional use conditions.

Applications

- Application of Novatio 2K Low MDI PU (PUB-1368) for sealing and bonding.
- Dispensing of high-viscosity two-component adhesives and sealants from 600 ml 1:1 cartridges.

Use

Preparation:

- Insert the 600 ml 2K cartridge (1:1) into the gun via the snap-fit system until it locks audibly.
- Attach the static mixer to the cartridge opening.
- Adjust the set screw if required.

Application:

- Depress the trigger gradually for consistent dispensing.
- Release the trigger to stop dispensing — the brake prevents dripping.
