- Look: liquid.
- Odour: characteristic.
- Viscosity (20°C): 1 mPa.s.
- Relative density (20°C) 0.790 kg/L.
- Auto ignition: 200°C.
- Flash point: 27°C.
- Water solubility: insoluble.
- Vapour pressure (20°C): 460 Pa.
- Boiling point/Boiling range: 130-300°C.
- Melting point/Melting range: <-20°C.
- Volatile organic components, %: 68,220.
- Volatile organic components, gr/l: 538,2.
- Shelf life: 36 months, keep dry, cool and frost-proof.
- Safety measures and storage: please consult the Safety Data Sheet.

## Packing

Surface Renewer - bottle 400ml

485302000

## Product

### Characteristics

Surface Renewer is a ready-to-use cleaner that renews UV weathered coating of aluminium joinery of other coated surfaces, powder-coated windows, doors, blinds, railings, gates, ... . Surface Renewer can also be used on PVC windows and doors, boats, caravans, verandas, pergolas, ... . Treated regularly with Surface Renewer, surfaces are protected and keep their new look.

### Applications

- suitable for all coated (unvarnished) or powdercoated materials: windows and doors, garage doors, verandas, roof windows, terraces, carports, railings, ... .
- on plastics: roller blinds, mobile homes, caravans, leisure boats, sport planes, ... .

## Use

Preventive on good and clean surfaces:

Apply directly with a soft, clean and dry sponge.

Shine up with a soft, clean and dry cloth.

Curative on dirty, weathered surfaces:

If necessary, clean thoroughly with Novakleen before treating with Surface Renewer.

Dosage: ready to use.
