

Penetron

GRAPHITE ANTICORROSION OIL

- ✓ Penetrating for precision lubrication of fine mechanisms.
- ✓ Long-term protection.
- ✓ Dissolves rusted parts.

Technical Info

- Appearance (at 20°C): liquid.
- Odour: petroleum-like.
- Colour: amber.
- Flashpoint: 42°C.
- Explosion limits: 0,6 / 8,0 vol% (°C).
- Relative density (at 20°C): 0,80.
- Water solubility: 0 g/100 ml.
- Shelf life: 36 months, keep dry, cool and frost-proof.
- Safety measures: consult the Safety Data Sheet.

Packing

Penetron - aerosol 500ml

902301000

Product [PEN]

Characteristics

Penetron is a multifunctional rust-resistant and rust dissolving penetrating oil with a very longlasting lubricating effect, due to the addition of graphite and Molybdeen Sulfide. Penetron reacts quickly and is economical in use.

Applications

- To release jammed screws, bolts and nuts, pipe fittings and joints.
- Lubrication of cables and all types of chains.
- Protection of metal surfaces against rust.

Use

- Apply.
- Allow to act.
- Rub off if necessary.
