

MBX

REMOVE GLUE RESIDUES SAFELY AND FAST

- ✓ Sand-blast effect thanks to the unique folded, polished and hardened spring steel.
- ✓ The flexible arrangement of the steel wires makes it possible to process all shapes.
- ✓ Maximum flexibility, MBX band carried on air cushion.
- ✓ Ideal running speed due to special reduction system, 3500 rpm without loss of power.
- ✓ Safe construction.
- ✓ Rubber Brush for simple fast removal of glue residue.

Technical Info

Coarse:

- 0.7 mm spring steel, bent, polished and hardened.
- Coarse sand blast effect.
- Removal of undercoating and sealing cement.

Medium:

- 0.5 mm spring steel, bent, polished and hardened.
- Fine sand blast effect.
- Removal of paint and rust.

Fine:

- 0.5 mm spring steel, straight.
- No sand blast effect.
- Removal of packaging.

Packing

MBX machine	356101000
MBX - replacement adapter without axle	356145000
MBX - adapter six-sided axle, use in drilling machine	356000000
MBX - adapter six-sided, twisted-off axle 6mm	356001000
MBX band - coarse, black	356110000
MBX band - medium, beige	356120000
MBX band - fine, green	356130000
MBX band - Inox	356135000
MBX Rubber Brush	356140000

Product

Characteristics

MBX bands are made of high quality polyamide fabric with a tensile strength of up to 440 kg. The spring steel wires are anchored in a U shape. This product offers optimum flexibility. Safety and life span: no satiation, heating or polishing necessary. MBX Rubber Brush makes it possible to remove glue residues safely and quickly. MBX Rubber Brush is made up of the latest high-tech polymers and has a long lifespan.

Applications

Bodywork

- removal of undercoating (coarse)
- removal of sealing materials (cements - coarse)
- removal of paint (fine)
- removal of rust (medium)
- removal of glue residue
- no heating of the surface
- no satiation or spreading out
- does not remove any healthy material, no grinding effect (fine)
- removes glue residues from decorative strips, spoilers and emblems (Rubber Brush)
- removal of lettering on bodywork (Rubber Brush)

Mechanical

- removal of packaging (fine)
- removal of rust (medium)
- removal of paint (fine)
- cleaning of parts (fine)
- cleaning of aluminium (fine) roughening of various materials before glue application

Industry

- removal of rust from metal surfaces (coarse)

MBX band - beige - width 11mm	356121000
MBX band - black - width 11mm	356111000
MBX band - green - width 11mm	356131000

- removal of paint and contamination of stone and wood (medium fine)
- removal of glue residues from various surfaces (medium)
- roughening of various materials for gluing (fine)
- removal of cement residues from tools (medium)
- cleaning or rust removal on difficult surfaces, fencing, pipes and corners
- cleaning of aluminium (fine)
- sand blast effect without sand blast installation (coarse)
- does not remove any healthy material no grinding effect
- removal of lettering (Rubber Brush)
- removal of hardened silicones (Rubber Brush)
- removal of hardened cement on construction equipment (shovel, spade, trowel, spirit level,...) (medium and coarse)
- removal of chalk deposit (Rubber Brush)
- removal of discoloration of stainless steel welding seams (RVS)

Use
