

HYC-112 Desinfect Cleaner

DISINFECTANT SURFACE CLEANER

- ✓ For all surfaces.
- ✓ Effective against viruses, fungi and bacteria.
- ✓ Increased effect by slow evaporation.

Technical Info

- Active substance: ethanol.
- Form: liquid.
- Color: colorless.
- Odor: light citrus scent.
- Density at + 20°C: 0.85 g/ml.
- Flash point: 12°C.
- Water solubility: completely.
- Consumption: +/- 50 ml/m².
- Shelf life: 24 months, dry, cool and frost-free in original packaging.

Packing

HYC-112 Desinfect Cleaner - aerosol 500ml	743055000
---	-----------

Product [HYC-112]

Characteristics

Easy and fast-acting cleaner and disinfectant for all contact surfaces. Increased effect by slow evaporation.
Approval number: BE-REG-01083.

Applications

- Antibacterial, antiviral and fungicidal treatment of contact surfaces.
- Cleaning and disinfection of door handles, keyboards, payment terminals, laptops, ...

Use

- Turn off the power to electrical appliances.
 - Treat the surface completely and allow to act for a minute.
 - Wipe off using a Novawipe Microfibre.
- If in doubt, test surfaces for resistance first. Consumption: +/- 50 ml / m² (1 liter = 20 m²).

Hygienic cleaning according to WHO / ECDC guidelines *

Step 1: Remove human pollution

- Viruses and bacteria survive longer in a layer of saliva, snot, skin fat or other human pollution. There it is safe for the action of alcohol. Therefore, regular and thorough cleaning should be done with a product aimed at removing that human pollution: Multifoam, Multifoam FS, Novakleen pH9 / pH13, Aquasolv, FA Clean, Floor Clean, Novawipes.

- Rubbing increases efficiency. Rinsing with pure water is preferable in order to remove the contamination to the maximum. Used Novawipe Microfibre or Floor mops should be treated with precaution. Wash at 60°C as soon as possible.
- Frequency: At least once a day. With intensive use (butchers, bakers, pharmacies, dining rooms, changing rooms, ...): several times a day.

Step 2: Disinfection and removal of skin fats (sebum)

- In this step, we remove the residues of skin fats and defuse viruses (COVID-19) and bacteria.
- Spray HYC-112 Disinfect cleaner abundantly over the entire surface and let it evaporate. After at least one minute, wipe off with a pure Novawipe Microfibre. No rinsing is necessary. Here, too, the used cloths must be carefully treated and washed at 60°C as soon as possible.
- Frequency: Several times a day, in function of human contact. In some cases, disinfection may be necessary after every contact: shopping trolleys, door knobs, collection desk,...
