

# HL-Fix Bundle and Tie

SAFE, QUICK AND EASY BUNDLING AND TYING

- ✓ Ultra thin hook and loop.
- ✓ Easy to use with low peeling force resistance.
- ✓ High tensile strength with an optimised hook-loop connection.
- ✓ High material strength due to the special polypropylene.
- ✓ Also safe to use on most sensitive materials thanks to its soft finish.
- ✓ For indoor and outdoor use, with good humidity and weather resistance.
- ✓ Available in two colours: black for neutral bundling and tying, fluorescent yellow for noticeably safer tying.
- ✓ Comes with a handy dispenser with belt clamp and cutting blade.

## Technical Info

- Carrier: polypropylene.
- Width: 15 mm.
- Length: 3 m.
- Average peeling force: new tape: 88,84 g/cm<sup>2</sup>.  
After 3000 closings: 67,11 g/cm<sup>2</sup>
- Average tensile strength: new tape: 1,46 kg/cm<sup>2</sup>.  
After 3000 closings: 1,31 kg/cm<sup>2</sup>

| HL-Fix Bundle and Tie yellow - roll 15mm / 3m | 562815000 |

## Product

### Characteristics

HL-Fix BT is a very fine polypropylene Velfix for tying and bundling. This special technology allows for a low peeling force resistance, which guarantees user friendliness that directly opposes its high tensile strength. The soft finish respects the most sensitive materials and even plants. Its humidity and weather resistance makes it perfect to use indoors as well as outdoors. HL-Fix BT can be open and closed hundreds of times. The greater the overlap, the stronger the connection. HL-Fix BT is available in two colours: black and fluorescent yellow. The black version is used to bundle and tie neutrally, while the fluorescent yellow version makes it all noticeable. The handy HL-Fix BT dispenser is small and comes with a belt clamp and a cutting blade.

## Use
