Surface Protection & Treatment

Technical Info

- Appearance: liquid.
- Odour: characteristic.
- Viscosity (20°C): 1 mPa.s.
- Relative density (20°C) 0.790 kg/L.
- Self-ignition: 200°C.
- Flashpoint: 27°C.
- Water solubility: insoluble.
- Vapour pressure (20°C): 460 Pa.
- Boiling point/boiling range: 130-300°C.
- Melting point/melting range: <-20°C.
- Volatile organic compound, %: 68.220.
- Volatile organic compound, g/l: 538.2.
- Shelf life: 36 months, dry, cool and frost-free.
- Safety measures and storage: please consult the safety data sheet.

Packing

Surface Renewer - bottle 400ml

485302112

Product [SUR R&D]

Characteristics

The ready-to-use cleaner and restorer of UV-weathered coating such as varnishes and powder paints on windows, doors, shutters, balustrades, gates, etc., also on PVC: windows, doors, boats, caravans, verandas, pergolas, etc. With regular treatment, the surface is nourished and the appearance remains like new.

Use

- If necessary, first clean thoroughly with Multifoam.
- Apply with a soft, clean and dry sponge.
- Remove excess with a clean, soft cloth.
