

Novakleen Heavy Duty

CONCENTRATED CLEANER FOR ALL SURFACES

- ✓ Quick, thorough cleaning
- ✓ Sparkling shine
- ✓ Lasting protection
- ✓ Antistatic wax layer
- ✓ For manual use as well as in installations
- ✓ Over 90% biodegradable

Technical Info

- Composition: stabilized mixture of biodegradable surface-active substances and penetrating with oxidized solvents and modified alkalis.
- Form: liquid.
- Odour: characteristic.
- Viscosity at 20°C: 1 mPa.s.
- Solubility in water: fully soluble.
- Relative density at 20°C: 1.050 kg/l.
- pH value: 13.4.
- Vapour pressure at 20°C: 23,32 hPa.
- Autoignition: 230°C.
- Shelf life: 24 months, keep dry, cool and frost-proof.

Packing

Product [NVK HD]

Characteristics

Novakleen Heavy Duty is a concentrated highly alkaline cleaner for large areas. Contains tensioactive ingredients which are over 90% biodegradable according to OECD standards.

Applications

The cleaning of lorries and trailers, tarpaulins, covers, caravans and motorhomes, boats, metal structures and panels, tents, plastics, PVC, furniture... .

Use

Manual application:

- Add max. 1 to 2% to water
- Wash with sponge or brush
- Rinse off with copious amounts of water

With nebuliser:

- Add 3-5% to water, depending on level of soiling
- Spray from the bottom upwards
- Allow to penetrate for max. 2 minutes then rinse off with copious amounts of water

With high pressure cleaner and brush equipment with foaming unit

- Fill product tank
- Set dosage to 3-5%

Do not allow to dry out, avoid spraying on hot surfaces, do not apply in full sunlight. Increase dosage in cold weather, reduce dosage in hot weather.
